

UW CA SHA-1 Sunset

The SHA-1 sun has set. Certificates with a SHA-1 signature are no longer available from UW CA.

UW CA began issuing SHA-2 certificates by default on April 27, 2016. SHA-1 certs can be requested by emailing help@uw.edu. Requests will usually be granted as long as the validity period of the certificate falls in the ranges below. Since a SHA-1 collision [has been demonstrated](#) as of February 2017, we may ask for approval from the the owner of the resources you are accessing before granting the request.

Year Cert Issued	Validity Period
2017	1 year from issue date
2018	<= 6 months from issue date
2019 (before May 1)	<= 3 months from issue date

UW CA will not issue SHA-1 certs after May 1, 2019.
