

Groups WebService Delete Group

Delete a group

Resource

- **DELETE** | **(root)**/group/{group_id}

The **group_id** can be a group name (cn) or a regid.

Return

200	Group deleted or not found.
401	No authorization

Notes

- Delete group does not use an If-Match header.

Conventions

{text} : replace {text} with specific content

(root) : Webservice URL base
