

Groups Web Service Rename-Move

The rename-move resource allows you to alter a group's id--with the additional effect of altering the corresponding name part of all subgroups.

- Rename: Change the extension name of the group's id.
- Move: Change the stem of the group's id.

Resource

- **PUT** | **(root)/groupMove/ {group_id}?newext=new-extension||newstem=new-stem**
- The **group_id** can be a group name (cn) or a regid.
- You must specify either a new extension or a new stem, but not both.

Return

200	renamed or moved
400	invalid request
401	Not authorized
404	Group or target stem not found

Conventions

{text} : replace {text} with specific content
