

# Changing the Name or Tagline of your Blog

## Changing the Name or Tagline of your Blog

Your blog is automatically created with a name closely resembling "Blog of <NetID>." It is often desirable to change this to something a little more creative, descriptive, or unique.

Additionally, you can change your tagline. This is usually displayed immediately below your blog title.

## Instructions

1. Log into [your Blog](#)'s administrative interface.
2. Click on "Settings" and then "General."
3. Edit your site title and/or tagline as desired, and click on save.
